

opal group

We have been proceeding with innovative objectives based on the day's needs since 1989, when we embarked on business life. We reflect our 32 years of expertise on the projects we undertake. We aim to address people's eyes and souls with our works.

We believe that the work we perform is not realized only for the customer. Our customers constitute an environment, while the environment is an interpretation of our works.

We adopted the duty to make happy the customers who are to create satisfaction in the circle, beautify people's environment, and make the social environment beautiful. With the consciousness of the fact that the future and environment are some of the responsibilities we assume, we adopted the objective of acting in line with all impact analyses in the works we perform and achieving sustainability thereby.

COMPLETED PROJECTS

ÇAMLICA MOSQUE

The scope consists of the 1st Phase and 2nd Phase.
